CompressorBot

compressorbot.com

Greetings,

We are now wrapping up week 7 so we now have less than a week to go you can access the site at http://compressorbot.com/development/site/ using username guest and password wfp0212. This past week went much smoother than the previous week. We now have a fully functioning compressor as well as a decompressor. I still have not fully completed the integration of the CSSLint, JSLint, and validator but those should be online well before Wednesday for our launch. I also need to finalize the upload/download system and the payments through Paypal we can accept payments at the moment all that needs to be added is a verification that the payment is made for the registration process. I see no reason why we should have any issues meeting the launch this Wednesday once again thank you for your support.
